

CYBERSECURITY FOR IDENTITY & ACCESS MANAGEMENT (I&AM)

Cybersecurity is the practice of protecting systems, networks, data, devices, and programs from any malicious digital attacks that aim to access, change, or destroy sensitive information

OPPORTUNITY DEFINITION | CYBERSECURITY | DIGITAL IDENTITY

This initiative is part of the organization's ambition to implement an enterprise-wide Identity & Access Management solution (I&AM) to configure, manage and enforce a framework of policies that ensures that the right users have appropriate access to the information and technology resources.

TARGET MARKET

Target Market

Ashghal Public Works Authority

Target Users

- Digital, IT & Network functions within the organization

KEY PROBLEM STATEMENT | NEED

Identity and Access Management become increasingly important due to data privacy requirements, cyber security challenges and threats, as well as multifaceted organizations that are not confined to a single office location (Borderless Networks).

To implement an I&AM Solution, providing an additional layer of security towards a stronger cybersecurity portfolio that ensures that the access can be dynamically controlled, maintained and monitored at an enterprise level.

PROCUREMENT CYCLE

Identification Stage

The opportunity will be tendered during 2022.

TIMESPAN

Total duration of 12 months including identification, testing and implementation.

ADJACENT OPPORTUNITIES

- Cloud Migration

STAKEHOLDERS

- Ashghal Public Works Authority

OWNER AND SECTOR

Owner Ashghal Public Works Authority – Information Systems Department (ISD)

Sector Public Administration

BUDGET ACROSS CYBERSECURITY ECOSYSTEM

The Qatar market for Cyber Security is projected to reach **USD 1,642 million** by 2026, at a compound annual growth rate (CAGR) of 13% from 2022 to 2026.
